Mutia Hulwah Nur Alif

Android Developer

I am a beginner who wants to become a professional by continuing to learn and develop in the IT field. I want to contribute to the advancement of IT in all areas of life, one of which is the development of Android applications as a solution to the proximity of technology to human activities. I have technical expertise in Android mobile app development. Focus on design details and features to increase app value and usability. I am dedicated and responsible for delivering the best results for the tasks I handle. I can work individually or in a team by coordinating and working on effective communication for project success. I am happy and quick to learn new things, looking for opportunities to improve myself because investing in self-improvement will help me keep growing one step higher.
